

I am contacting the FCC to request that you do not change or alter in any way the Indiana Do Not Call law. Since it went into effect my privacy has been protected. I used to receive intrusive phone calls at all hours of the day. These calls were a total waste of the telemarketers time as I would be so angry that I would yell at them. Please do not change what I believe is a great law. My family and I would appreciate the FCC not letting the banking industry or anyone else influence the FCC. My rights must be protected.
